Hey there, I'm looking for all the Fashion Girl Vaults I can find. I have the Vault Girl Tree and Bobblehead's replacement, but I know there's more. I've seen some replacements for posters and Charisma checks of this kind, but I can't find them on the Nexus. SFW or NSFW, or one. If you know Asylum Girl mod, I definitely appreciate it. My personal view of Asylum Meat Preset for your game. AGodComplexPikachu and everyone else associated with LooksMenu and looks menu Settings Compendium This mod is not chosen in getting donation items Well, I realize that I'm a little late to the party with yet another Preset Vault Meat. But considering most of them I've seen pretty much went to a more realistic approach to The Meat Sanctuary and although it's not necessarily a bad thing that I felt I should have been more of a literal attempt out of it, that we all know and love the character. So with that in mind, I set out to try to create a non-pseudo Nora Asylum Meat for a more anime style one instead. So features wise I gave her more almond-shaped heads, with a little more anime-style eyes, a smaller mouth and a narrow chin, pink red facial cheeks, thick black eyeshadow and eyeliner, and a constantly subtle cheeky grin. Similarly, with the form of Meat Refuge, I included, I went for a proportionately thick and lush anime body that hopefully better fits her art style. As for whether I succeeded or not, I will leave it to my question. Everyone has their own personal preferences when it comes to this character. It just turns out to be mine. I hope you find Preset useful. CheersBB videogame_asset My games When logged in, you can choose up to 12 games that will be displayed as favorites in this menu. Changes include, but are not limited to; NPC wear the correct BoS Power Armour paint for their rank, custom PA Rank marks for those without (based on Bethesda designs), plasma/Gauss weapons, as in F03/NV. Changes the main menu at The Meat. Seeing Asylum as SHADMAN hasn't done any animations using Vault Meat yet, the main menu isn't animated with this mod. Currently supports 16:9, 16:10, 4:3 and 21:9! (16:10 added to v1.3, NMM installation only) Also make sure you download the correct side ratio. For example, don't download 4:3 when you have a 16:9 monitor because you think it looks better. I did different odds for a reason. Bad things happen if you try to use 4:3 on a 16:9 monitor! The main music menu is not changed. This package setup will allow you to choose your aspect of the ratio when installing. The installer package includes all 4 aspects ratios. Any errors with the set setup, let me know and I fix it! n_n My doesn't support 4:3, 16:10 and 21:9, so the launch of the game in these resolutions wasa bit funky on my computer, so I apologize for the wobbly screenshots for these resolutions. For those who support these resolutions, feel free to upload screenshots! Showcased from the Vortex Gaming Society in its Fallout 4 Mods: Episode 5 video! I encourage users to upload their own screenshots and videos on Fashion! Recommended set with NMM so that it keeps a backup. If there is any problem, let me know. About this fashion: This character is based on Shadman's Vault Meat. As mentioned above, you can choose from 3 different save files. Since Fallout 4 has just been released and there is no right way to add new hairstyles, I chose the closest one I could find. It will be updated as soon as possible to order. The same applies to the sponge. Installation: Just select your choice file and throw it into the documents/mygames/Fallout4/saves/. After the ingame, you may have to click on select the character in the download menu to be able to see the saves! Have fun! Frequently asked questions / Mistakes: F: I do not see save files in loadingmenu! A: Make sure you have the right character selected and placed savefiles in the right place! I would like to add more frequently asked questions here, but to be honest, setting this fashion is so simple, I can't imagine anyone would work in Using it ...
